selected grid maximum	figure06_reaction_selectivity	selectivity_quartet-manifold_mixture	Not available	quartet-manifold mixture PQ/4

The extrema describe the sampled computational grid only. Presentation values are rounded. All 13 source rows and all 53 source columns remain in table05_controls_and_extrema.csv; 41 provenance/support columns are source-only. 'Not available' is distinct from numeric zero.
